British Columbia Sessional Papers: Microform collection

Key to Entries:

Type—Financial:

- “Returns of Revenue and Expenditure” usually provide detailed expenses of keep, provisioning and transport of “lunatics”
- “Estimates, Supplementary Estimates and Total Estimates [for following year]” provide cost projections of keep, provisioning and transport
- “Public Accounts” is comprised of the same data as contained in the above classifications but is more comprehensive

Type—Return:

- “Return” is usually indicative of a return to the legislature of correspondence or of reports commissioned by government (correspondence such as the Flora Ross series)

Type—Report:

- “Report” is a submission by a ministry or officer to the house (most often reports of Public Works that include building maintenance and repair costs germane to the housing of lunatics).

Type—Official Report:

- “Official Report” indicates special inquests and reports by high officials into conditions endured by the insane and/or recommendations for improvement.

Type—Statistical Report:

- “Statistical Report” refers generally to the yearly Asylum reports starting in 1883/1884.

Type—Statistic:

- “Statistic” is included specifically for deaths for the year 1872-73 since they corroborate report by officials on the living conditions of Victoria gaol, which may have been a factor in lunatic deaths.
